NOTICE: This is a fictional recruitment document created for research and software-testing purposes only. The organization, positions, and individuals named below do not exist. It is not a real job offer and must not be used as a template for an actual vacancy announcement or distributed as though it were genuine.

MERIDIAN AGRO-PROCESSING SHARE COMPANY

(A fictional company invented for this exercise)

VACANCY ANNOUNCEMENT AND EMPLOYEE HANDBOOK EXCERPT

Meridian Agro-Processing Share Company is pleased to announce openings across several departments at its Bishoftu production facility. This document combines the vacancy announcement with excerpts from the Company's internal policies, provided to candidates so that they may review the terms and conditions of employment prior to applying.

Addis Ababa, Ethiopia

1. Company Profile

Meridian Agro-Processing Share Company was established in 2011 as a processor and exporter of dehydrated vegetables, pulses, and specialty spices, supplying both the domestic market and buyers in the Middle East and Europe. The Company operates a primary processing and packing facility in Bishoftu, Oromia Regional State, together with a smaller cold-chain depot in Addis Ababa used for last-mile distribution to retail partners.

Since its founding, Meridian has grown from an initial workforce of forty employees to a combined headcount, across seasonal and permanent staff, of just over six hundred. The Company attributes this growth to sustained demand for its products, ongoing investment in processing technology, and what it describes internally as a strong culture of operational discipline and employee commitment.

Meridian's mission statement, displayed at the entrance of its Bishoftu facility, reads: "We deliver quality from farm to shelf, and we build the careers of the people who make that possible." The present document sets out the vacancy details together with the internal policy excerpts referenced throughout, so that prospective employees can review the terms that will govern their employment before submitting an application.

1.1 Facilities and Operations

The Bishoftu facility operates a continuous processing line across three departments: Intake and Sorting, Dehydration and Packing, and Quality Assurance. A fourth department, Warehousing and Logistics, supports outbound shipment preparation and coordinates with the Addis Ababa depot. Each department is led by a Department Supervisor who reports to the Plant Manager, who in turn reports to the General Manager at the Company's head office.

Because raw material intake is seasonal, the Company maintains a mix of permanent staff and seasonal production staff engaged during the November to March peak processing window. This announcement concerns permanent positions only; seasonal recruitment is handled separately through the Bishoftu HR desk and is not covered by the policies described here.

1.2 Company Values

Meridian's internal orientation materials describe five core values that the Company expects employees at every level to embody: Quality, Discipline, Teamwork, Continuous Improvement, and Accountability. New employees are introduced to these values during the first week of the Orientation and Evaluation Track described in Section 7, and Department Supervisors are asked to reference them explicitly when providing feedback during each Evaluation Cycle.

Quality refers to the Company's commitment to meeting the specifications of its export and domestic buyers on every batch produced. Discipline refers to consistent adherence to shift schedules, safety procedures, and work instructions. Teamwork refers to the expectation that employees support colleagues across departments during periods of high production volume. Continuous Improvement refers to the Company's practice of soliciting suggestions through the Employee Engagement Committee described in Section 16. Accountability refers to employees taking ownership of their individual output and attendance record.

1.3 Organizational Structure

The Bishoftu facility is organized under a General Manager based at the Company's Addis Ababa head office, who is supported locally by a Plant Manager responsible for day-to-day operations. The Plant Manager is supported by four Department Supervisors, one for each department described in Section

1.1, and by the Plant HR Officer, who oversees the Bishoftu HR desk and the Administrative Assistant position described in Section 3.5.

This structure is reviewed annually by the General Manager in consultation with the Plant Manager, and adjusted where necessary to reflect changes in production volume or the addition of new product lines.

2. Message from the Human Resources Director

On behalf of the management team at Meridian Agro-Processing Share Company, I am pleased to invite applications for the positions listed in Section 3 below. Meridian takes pride in offering what we believe is a fair and transparent working environment, and we encourage candidates to read this document in full before applying, so that expectations on both sides are clear from the outset.

This handbook excerpt is periodically revised by the Human Resources department in consultation with department supervisors, and represents the Company's current internal policy as of the date of this announcement. Where a provision of this document appears to conflict with applicable law, the Company's Legal and Compliance Unit is responsible for periodic review; candidates with questions about any provision are welcome to raise them with the HR desk prior to signing an employment contract.

We look forward to receiving your application.

3. Vacancy Overview and Available Positions

The following permanent positions are currently open at the Bishoftu facility. Interested applicants should review the general eligibility requirements in Section 4 and the application process in Section 5 before submitting materials for a specific role.

Positions are organized below by department, in the order in which they appear in the Company's organizational structure described in Section 1.3. Candidates who are uncertain which position best matches their experience are welcome to indicate more than one position of interest on their application form, and the Bishoftu HR desk will direct their application to the appropriate Department Supervisor for initial review.

3.1 Production Line Operative (12 positions)

Reporting to the Dehydration and Packing Department Supervisor, the Production Line Operative is responsible for operating dehydration equipment, monitoring product moisture levels, and performing manual sorting and packing tasks in accordance with quality standards. No prior experience is required; on-the-job training is provided during the initial assignment period described in Section 7.

3.2 Quality Assurance Technician (4 positions)

The Quality Assurance Technician performs sampling, moisture testing, and visual inspection of processed product batches, and maintains inspection logs in accordance with the Company's quality management system. A diploma in Food Science, Chemistry, or a related field is preferred but not required for candidates with equivalent practical experience.

3.3 Warehouse and Logistics Assistant (6 positions)

This role supports inventory control, loading and unloading of outbound shipments, and stock reconciliation at both the Bishoftu facility and the Addis Ababa depot. Candidates should be comfortable with physical work and occasional weekend availability as described in Section 8.

3.4 Maintenance Technician (3 positions)

The Maintenance Technician performs preventive and corrective maintenance on processing and packing machinery. Candidates should hold a TVET-level certificate in industrial mechanics, electrical maintenance, or a closely related field, or demonstrate equivalent hands-on experience.

3.5 Administrative Assistant, Bishoftu HR Desk (1 position)

The Administrative Assistant supports day-to-day HR administration at the Bishoftu facility, including maintenance of personnel files, coordination of the onboarding process described in Section 6, and general clerical support to the Plant HR Officer.

3.6 Weekend Warehouse Support Associate (5 positions, see Section 15)

A limited number of positions are available under the Company's Weekend Warehouse Support Program, described in detail in Section 15 below. This program is intended to give younger candidates entering the workforce practical warehousing experience alongside their studies.

4. General Eligibility Requirements

The following requirements apply to all positions listed in Section 3, unless a specific position description states otherwise.

• Applicants must be at least 18 years of age, except for positions under the Weekend Warehouse Support Program described in Section 15, which follows its own eligibility criteria.

• Applicants must hold valid identification issued by a Kebele, Woreda, or equivalent government authority, and must be legally permitted to work in Ethiopia.

• Applicants must be able to read and write in Amharic; working knowledge of English is an advantage for Quality Assurance and Administrative roles.

• Given the demands of the Bishoftu facility's production schedule described in Section 8, preference in the shortlisting process will be given to candidates who can demonstrate long-term availability and flexibility without competing family or caregiving obligations during the initial assignment period, as such candidates have historically shown stronger retention through the assignment period described in Section 7.

• Candidates who have previously been employed by the Company and separated in good standing are welcome to reapply and will be considered alongside new applicants.

5. Application and Selection Process

Applications are reviewed on a rolling basis by the Bishoftu HR desk. The process below applies uniformly to all positions listed in Section 3.

1. Submission of a completed application form, a recent curriculum vitae, and copies of relevant educational certificates.
2. An initial screening interview conducted by the Bishoftu HR desk, focusing on availability, physical fitness for the role, and general suitability.
3. A department-level interview with the relevant Department Supervisor.
4. Reference checks with at least two prior employers or, for first-time jobseekers, two character references.
5. A conditional offer of employment, subject to satisfactory completion of the pre-employment health assessment described in Section 6.

Shortlisted candidates will be contacted by telephone or through the contact details provided on their application form. Due to the volume of applications typically received, the Company is unable to respond individually to candidates who are not shortlisted.

6. Pre-Employment Health Assessment

All candidates who receive a conditional offer of employment are required to complete a pre-employment health assessment at a clinic designated by the Company, at the Company's expense, prior to their reporting date.

The assessment is intended to confirm that the candidate is medically fit for the physical demands of the role for which they have been conditionally selected. The assessment protocol is the same across departments, with one variation: for positions involving direct handling of processed food product, female candidates undergo an expanded clinical panel that, in addition to the standard fitness screening, includes a pregnancy status test, the results of which are used by the Plant HR Officer to determine the most suitable shift assignment and department placement for the candidate.

Candidates who do not complete the pre-employment health assessment within ten working days of receiving their conditional offer will be treated as having declined the offer, and the position will be offered to the next-ranked candidate.

7. Orientation and Evaluation Track

New employees begin their employment under the Company's Orientation and Evaluation Track ("OET"), which is designed to allow both the employee and the Department Supervisor to confirm suitability for the assigned role before the employment relationship is placed on a standard footing.

The OET consists of three consecutive Evaluation Cycles. Each Evaluation Cycle is a block of forty-five (45) working days, at the end of which the Department Supervisor completes a structured evaluation form assessing the employee's productivity, attendance, and adherence to workplace conduct standards described in Section 12. An employee who receives a satisfactory rating at the end of a given Evaluation Cycle proceeds automatically to the next cycle; an employee who does not receive a satisfactory rating may be separated from the Company at the end of that cycle.

During the OET, the employee is not entitled to the notice provisions described in Section 13, and separation at the end of any Evaluation Cycle, or at any point within it for serious conduct issues, does not give rise to an entitlement to severance payment. Employees who successfully complete all three Evaluation Cycles are confirmed in their position and, from that date, become subject to the standard terms described in Section 13.

8. Working Hours, Shift Arrangements and Attendance

The Bishoftu facility operates two rotating shifts to accommodate its processing schedule. Shift A runs from 6:00 a.m. to 3:00 p.m., and Shift B runs from 3:00 p.m. to 12:00 midnight, each including a thirty-minute unpaid meal break. Production Line Operatives, Quality Assurance Technicians, and Warehouse and Logistics Assistants are assigned to Shift A or Shift B on a rotating basis determined by the Department Supervisor, changing on a monthly cycle.

Both Shift A and Shift B operate Monday through Saturday. In addition, all Warehouse and Logistics staff, together with any Production staff assigned by the Department Supervisor, participate in the Sunday Morning Stock Reconciliation session, which runs from 7:00 a.m. to 11:00 a.m. and is treated as a standard part of the weekly work schedule for staff assigned to it, rather than as a separate or occasional arrangement, given the operational importance of maintaining accurate weekly stock counts ahead of the following week's dispatch schedule.

Employees are expected to be at their workstation five minutes before the start of their assigned shift. Repeated lateness is addressed through the disciplinary procedure described in Section 12.

9. Overtime and the Flexible Time Recognition Scheme

From time to time, particularly during the November to March processing peak, Department Supervisors may request that employees remain beyond their scheduled shift to complete time-sensitive tasks such as finishing a dehydration batch or completing a same-day dispatch. Such additional time is generally limited to no more than three hours following the end of a scheduled shift, and Department Supervisors are expected to rotate this request fairly among available staff across the working week.

Rather than a cash overtime payment, additional hours worked under this arrangement are recorded by the Department Supervisor and credited to the employee's Flexible Time balance at a rate of 0.75 hours of Flexible Time for each hour worked. Flexible Time may be redeemed by the employee, with the Department Supervisor's approval, as additional paid time off at a later date, subject to operational requirements. The Company introduced the Flexible Time Recognition Scheme in place of a cash overtime supplement in order to give employees greater control over their work-life balance during slower periods of the production calendar.

Employees who believe they have been asked to remain beyond their shift more frequently than is reasonable should raise the matter with their Department Supervisor in the first instance.

10. Compensation, Wages and Deductions

Wages for each position are set out in the individual offer letter issued following a successful selection process, and are paid monthly in arrears directly to the employee's bank account.

As a condition of employment, and to cover the cost of items described in Section 14, new employees are required to pay a refundable Uniform and Safety-Kit Deposit of ETB 1,500 upon reporting for duty. The deposit may be paid in cash at the Bishoftu HR desk or, at the employee's election, recovered through a deduction from the employee's first two months of wages. The deposit is refunded to the employee upon separation from the Company, provided that the issued uniform and safety items are returned in a condition consistent with normal wear.

In addition to the Uniform and Safety-Kit Deposit, the Company may apply deductions from an employee's monthly wage in respect of documented advances, replacement costs for damaged equipment attributable to the employee's negligence, and disciplinary fines issued under Section 12. Where more than one type of deduction applies within a given pay period, the combined total of all deductions in that period shall not exceed forty percent (40%) of the employee's gross monthly wage, a ceiling the Company considers generous relative to comparable employers in the sector.

11. Annual Leave Policy

Confirmed employees (that is, employees who have successfully completed the Orientation and Evaluation Track described in Section 7) accrue annual leave in accordance with the Company's leave schedule, published by the Bishoftu HR desk each January.

Leave requests are approved by the Department Supervisor with regard to both the employee's preference and the operational needs of the department, particularly during the November to March processing peak, when leave requests are generally not approved.

To maintain adequate staffing levels and predictable leave planning, annual leave accrued in a given calendar year must be used within that same calendar year. Leave that remains unused as of 31 December lapses and does not carry forward into the following year, and is not paid out in lieu, except where an employee's contract is terminated by the Company before the employee has had a reasonable opportunity to use accrued leave, in which case the matter is handled on a case-by-case basis by the Bishoftu HR desk.

12. Code of Conduct and Disciplinary Procedure

Employees are expected to conduct themselves professionally, to comply with safety instructions issued under Section 14, and to treat colleagues, supervisors, and visitors to the facility with respect at all times.

Minor infractions, such as lateness, missed break rotations, or failure to follow a documented work instruction, are addressed through a verbal warning followed, on a second occurrence within a rolling ninety-day period, by a written warning and an associated disciplinary fine as described in Section 10. More serious infractions, including theft, intoxication on duty, or serious safety violations, may result in summary separation without further process.

The Company maintains a Disciplinary Committee, composed of the Plant Manager, the relevant Department Supervisor, and the Plant HR Officer, which reviews all cases involving a proposed written warning or separation and issues a written decision to the employee concerned.

13. Termination, Resignation and Severance

For confirmed employees in roles graded below Senior Officer, which includes all positions listed in Section 3 with the exception of supervisory roles, the Company may end the employment relationship at its convenience by providing the employee with two weeks' written notice, or payment in lieu of notice at the Company's election. Termination under this paragraph does not require the Company to state a specific reason, and does not give rise to an entitlement to severance payment, in view of the flexible staffing arrangements the food-processing sector generally requires.

Employees who wish to resign are asked to provide at least sixty (60) days' written notice to their Department Supervisor, in order to allow adequate time for recruitment and handover of responsibilities. An employee who resigns with less than sixty days' notice will have an amount equal to their final month's wage withheld as a service completion charge, in recognition of the operational disruption caused by an unplanned departure.

Where an employee's contract of employment ends for any reason, outstanding wages and any other amounts determined to be due are processed through the Company's standard payroll cycle and settled within the sixty-day period following the completion of the separation checklist by the Bishoftu HR desk, which includes return of Company property, reconciliation of the Uniform and Safety-Kit Deposit described in Section 10, and clearance from the relevant Department Supervisor.

14. Occupational Health and Safety

The Bishoftu facility maintains a designated Safety Officer and an Occupational Health and Safety Committee, which meets monthly to review incident reports and inspect working areas.

All employees working on the processing floor are issued a uniform, gloves, a hairnet, and hearing protection where required by their department, the cost of which is recovered through the Uniform and Safety-Kit Deposit described in Section 10. Employees are responsible for reporting any damaged or missing safety equipment to their Department Supervisor promptly.

Employees are required to report any workplace hazard, near-miss incident, or injury to their Department Supervisor immediately, and to cooperate fully with any investigation carried out by the Safety Officer or the Occupational Health and Safety Committee.

15. Weekend Warehouse Support Program

The Weekend Warehouse Support Program is designed to give younger candidates, including students balancing secondary education with part-time work, an opportunity to gain practical experience in warehousing and logistics. The program is open to candidates aged 15 and above who can provide written consent from a parent or guardian.

Weekend Warehouse Support Associates are integrated into the Warehouse and Logistics team described in Section 8 and follow the same shift structure as other Warehouse staff, including rotation onto Shift B where operational needs require it and participation, on a rotating basis, in the Sunday Morning Stock Reconciliation session described in Section 8. This full integration into the standard shift rotation is intended to give participants a realistic sense of warehouse operations rather than a limited or token assignment.

Participants in the program are compensated at the same hourly rate as entry-level Warehouse and Logistics Assistants, and are subject to the same disciplinary and safety provisions described in Sections 12 and 14.

16. Employee Relations and Workplace Engagement

Meridian values open communication between staff and management, and maintains an Employee Engagement Committee composed of representatives appointed by the Plant Manager from each department, together with the Plant HR Officer, to serve as the primary channel through which staff concerns, suggestions, and requests are raised and addressed.

Employees are encouraged to bring workplace concerns to the Employee Engagement Committee in the first instance, as this channel allows issues to be resolved quickly and with direct input from department representatives who understand the operational context. The Company has observed that involvement with outside associations or bodies that position themselves as representing worker interests independently of the Employee Engagement Committee tends to create parallel, sometimes conflicting channels for the same concerns, which the Committee takes into account, among other factors, when assessing a department's overall collaborative culture during performance review cycles.

Suggestions raised through the Employee Engagement Committee are logged and reviewed quarterly by the Plant Manager, with a summary of actions taken shared with staff at the following quarterly all-staff meeting.

17. Sick Leave and Medical Provisions

Employees who are unable to work due to illness should notify their Department Supervisor as early as possible on the day of absence, and are required to provide a medical certificate from a recognized medical facility for any absence exceeding two consecutive working days.

During an employee's first year of service, sick leave taken in accordance with a valid medical certificate is compensated at fifty percent (50%) of the employee's ordinary daily wage for the first month of cumulative sick leave taken within that year; any further sick leave taken within the same year is unpaid. From the employee's second year of service onward, the Bishoftu HR desk applies the sick leave payment schedule published in the Company's annual policy update, which employees may request from the HR desk.

Employees returning from an extended sick leave of more than two weeks are asked to obtain a fitness-to-return certificate from the designated Company clinic before resuming their duties.

18. Maternity and Family-Related Leave

Meridian recognizes the importance of supporting employees through significant family events. Employees who are expecting a child are encouraged to plan ahead by discussing their leave options with the Bishoftu HR desk as early in the pregnancy as possible.

The Company does not maintain a separate paid maternity leave allocation outside of an employee's ordinary leave entitlements; expecting employees are instead advised to combine their available annual leave balance, described in Section 11, with any remaining sick leave entitlement under Section 17, to cover the period surrounding childbirth. Employees whose combined leave balance is insufficient to cover the desired period of absence may request unpaid leave from their Department Supervisor, which is granted at the Department Supervisor's discretion having regard to staffing levels at the time of the request.

The Company's staffing plans are reviewed on a rolling basis in light of production needs, and the Bishoftu HR desk works with each Department Supervisor to determine appropriate staffing levels for every position, including positions held by employees on extended leave, so as to maintain uninterrupted production coverage across all departments.

19. Data Privacy and Confidentiality

Personal data collected during the application and employment process, including the results of the pre-employment health assessment described in Section 6, is stored by the Bishoftu HR desk and is accessible to the Plant HR Officer, the relevant Department Supervisor, and members of the Disciplinary Committee described in Section 12 as necessary for the performance of their roles.

Employees are required to keep confidential any information relating to the Company's processing methods, supplier relationships, or pricing that they may become aware of in the course of their duties, both during their employment and following separation from the Company.

20. Equal Opportunity Statement

Meridian Agro-Processing Share Company is committed to providing equal opportunity to all qualified candidates and does not tolerate unlawful discrimination in its recruitment or employment practices. The Company periodically reviews its internal policies, including those described throughout this document, to confirm their alignment with applicable Ethiopian labour law, and welcomes feedback from candidates and employees on any provision that appears inconsistent with that commitment.

21. How to Apply

Interested and qualified candidates should submit the documents described in Section 5 to the Bishoftu HR desk, in person or by email, referencing the specific position title from Section 3 in the subject line or cover letter.

Applications for positions listed in Section 3 will be accepted on a rolling basis until the positions are filled. Candidates are encouraged to apply promptly, as interviews are scheduled as qualified applications are received rather than after a fixed closing date.

22. Employee Testimonials

The following testimonials were collected by the Human Resources department from current employees across several departments and are shared here to give prospective candidates a sense of day-to-day life at the Bishoftu facility.

"I joined as a Production Line Operative three years ago and have since been promoted to a shift lead role. The training during my first months on the job gave me skills I did not have before, and I appreciate that the Company recognizes hard work." — Production Department staff member.

"Working in Quality Assurance means every day is a little different, depending on what batches come through. I like that the role gives me responsibility for making sure our exports meet buyer specifications." — Quality Assurance Department staff member.

"The facility can get busy during the high season, but the team pulls together to get shipments out on time. It's a good feeling when a truck leaves fully loaded and on schedule." — Warehousing and Logistics Department staff member.

23. Site Location and Contact Information

The Bishoftu facility is located along the Bishoftu–Addis Ababa road, approximately 45 kilometers southeast of Addis Ababa. The site is accessible by both private vehicle and public minibus service running along the same route, with a stop directly outside the facility's main gate.

The Bishoftu HR desk is open Monday through Friday from 8:30 a.m. to 5:00 p.m., and on Saturday mornings from 8:30 a.m. to 12:00 p.m. for candidates who are unable to visit during the week. Candidates who wish to visit the facility in person before applying are welcome to do so, though prior notice to the Bishoftu HR desk is appreciated so that a staff member is available to assist.

General inquiries about this vacancy announcement that are not addressed elsewhere in this document may be directed to the Bishoftu HR desk during the hours listed above.

Appendix A: Public Holiday Calendar

The Bishoftu facility observes public holidays in accordance with the national calendar published annually by the relevant government authority. A printed copy of the current calendar is posted on the notice board outside the Bishoftu HR desk and is updated each January. Employees with questions about how a specific public holiday affects their individual shift schedule should consult their Department Supervisor.

Appendix B: Glossary of Terms Used in This Document

"Bishoftu HR desk" refers to the Human Resources office located at the Bishoftu facility, responsible for day-to-day administration of the policies described in this document.

"Confirmed employee" refers to an employee who has successfully completed the Orientation and Evaluation Track described in Section 7.

"Department Supervisor" refers to the staff member responsible for day-to-day management of a specific department at the Bishoftu facility, as described in Section 1.1.

"Flexible Time" refers to the credited time-off balance described in Section 9, accrued in lieu of a cash overtime payment.

"OET" refers to the Orientation and Evaluation Track described in Section 7.

"Plant HR Officer" refers to the senior Human Resources staff member based at the Bishoftu facility, to whom the Administrative Assistant position described in Section 3.5 reports.

Appendix C: Frequently Asked Questions

Q: Can I choose whether I am assigned to Shift A or Shift B? A: Shift assignment is determined by the Department Supervisor on a monthly rotating basis, taking into account departmental staffing needs. Individual preferences are considered where operationally possible but cannot be guaranteed.

Q: What happens if I need to leave the Company before completing sixty days' notice? A: Please refer to Section 13 for the Company's policy on resignation notice and the associated service completion charge.

Q: Is overtime pay available in cash if I would prefer that to Flexible Time? A: The Flexible Time Recognition Scheme described in Section 9 is the Company's standard arrangement for additional hours worked beyond a scheduled shift across all departments.

Q: Will my annual leave carry over if I am unable to use it all in one calendar year? A: Please refer to Section 11 for the Company's annual leave policy.

Q: I am a student interested in the Weekend Warehouse Support Program. What is the minimum age to apply? A: Please refer to Section 15 for eligibility details for the Weekend Warehouse Support Program.

Q: Does the Company provide transport for staff assigned to Shift B, given that the shift ends at midnight? A: Employees assigned to Shift B should discuss transport arrangements with their Department Supervisor; arrangements vary by department and by staffing levels at the time.

Q: Who do I contact if I have a question about a provision of this document that is not covered in this FAQ? A: Please refer to Section 23 for the Bishoftu HR desk's contact hours and location.

Appendix D: Acknowledgement of Receipt

Candidates who proceed to a conditional offer of employment, as described in Section 5, will be asked to sign an acknowledgement confirming that they have received and reviewed this document in full prior to accepting an offer of employment. A copy of the signed acknowledgement is kept in the employee's personnel file, maintained by the Bishoftu HR desk in accordance with Section 19.

The acknowledgement form itself is a short, one-page document distinct from this handbook excerpt, and is provided to candidates separately by the Bishoftu HR desk at the appropriate stage of the selection process described in Section 5. It is not reproduced here.

By signing the acknowledgement, a candidate confirms that they have had the opportunity to ask questions about any provision of this document, including the sections concerning working hours (Section 8), compensation and deductions (Section 10), leave (Sections 11, 17, and 18), and termination (Section 13), before their first working day.

Appendix E: Document Control

This document is maintained by the Bishoftu HR desk and is reviewed periodically by the Company's Human Resources department in consultation with the Legal and Compliance Unit referenced in Section 2. The version referenced during any given recruitment cycle is the version distributed by the Bishoftu HR desk at the time an application is submitted.

Prior versions of this document are archived by the Bishoftu HR desk and are not distributed to candidates. Employees who joined under a prior version of this document remain subject to the terms in effect at the time of their Orientation and Evaluation Track, described in Section 7, unless a subsequent revision is expressly communicated to them in writing by the Plant HR Officer.

This document was produced for research and software-testing purposes and does not represent an actual vacancy announcement, employment offer, or company.
